Subject: **New Dry Bath for Ultra Low Temperature (-90 C) Calibrations**

January 14, 2007

Dear Validation Professional,

Finally, a **new dry bath** is available for **ultra low temperature** calibrations. Lives International/Ametek introduces the Model ATC-125 dry bath. The dry bath has a calibration set point range of **-90 C to 125 C**. The unit is **truly portable** with a weight of only **44 Lbs**. No more need to deal with messy oils or alcohol/dry ice slurries. If you perform a large number of low temperature chamber validations then this new bath can save you considerable time and expense. In addition, the Lives XpertVal & XpertLog validation systems fully support this new bath for automated calibrations and documentation.

I have attached the product data sheet for your consideration. If you have any questions or need additional information, please contact me.

Sincerely,

Sheldon Lathrop  
Sales Engineer, BSCHE
