

Subject: **Lives XpertLog Wireless Loggers Selected For Validation Over Brand K**

June 26, 2007

Dear Validation Professional,

In the past year, Lives International continues to gain new customers over Brand K, E & M. The Lives XpertLog system (wireless dataloggers) and the Lives Ultra-Low Temperature Dry Bath (-90C to 125 C) were purchased and/or rented by: Merck, East Coast Validation, Eisai Research, Abbott Bioresearch, Genzyme, GSK, BMS and Human Genome to name a few. The main reasons the Lives equipment was selected are:

Lives XpertLog Wireless Datalogger System:

Small Size & Light Weight – No transfer of heat load to chamber.

*Loggers could be used in a **wider range of applications** (I.e. freeze dryers, -80 C freezers, autoclaves, stability chambers, SIP.)*

*Software supports **automated calibrations or verifications** for Kaye, Hart and Ametek calibration baths and reference probes. Also, easy to learn & use and **21CFR-11 compliant**.*

Comprehensive Reporting Features – No need to use third party software (i.e. Excel)

Built-in calculations and statistics easily added to the test reports (Fo, MKT etc.)

*Software supports **electronic signatures** for paperless reviews.*

*Significantly **less expensive** than stainless steel loggers*

Lives ATC-125 Ultra Low Temperature Dry Bath (-90 C to 125 C):

Dry Bath – No need to handle messy oils

Fast Response – Ambient to -80 C in 50 minutes

Light weight & Portable – Weighs only 40 Lbs.

If you are ready to consider alternative validation equipment, please consider the XpertLog wireless loggers or the Ultra-Low temperature bath from Lives International. Join the growing number of validation people who have found they can reduce their validation time & costs nearly in half.

Please contact me for more information or if you would like to arrange a system demonstration.

Sincerely,
Sheldon Lathrop
