

Subject: Validation Equipment Rentals – Lives XpertLog Wireless System

June 17, 2008

Dear Validation Professional,

Lives International is now offering validation equipment rentals for the XpertLog wireless datalogger system. Using XpertLog wireless loggers will reduce your re-qualification time in half with minimal disruption to your current operations. Renting equipment is an excellent solution for those who cannot justify a capital purchase but can justify the expense of a rental. Also, this may provide an opportunity to compare the Lives wireless system to the traditional thermocouple based approach.

The XpertLog rental system comes complete with the number of temperature, humidity and pressure loggers needed. This includes a logger docking station, XpertLog laptop computer and the calibration certificates for all loggers. Also, an SOP for "Thermal Chamber Mapping" is included that offers step by step instructions on how to set-up loggers for a test, data retrieval and generation of required reports (21 Part 11 compliant).

The XpertLog dataloggers can be used in wide range of applications including: autoclaves, -80 C freezers and freeze dryers. The loggers utilize a very accurate & stable RTD sensor technology with a measurement range of -80 C to 100 C or -60 C to 150 C . The loggers are calibrated to +/- 0.1 C over the entire range. Unlike thermocouples, pre-calibration is not necessary for the temperature loggers. A simple one or two point post-verification is all that is needed. XpertLog will interface and automate your existing calibration equipment (i.e. LTR, HTR, IRTD) if needed for post verifications.

In addition, Lives International offers the Lives ultra-low temperature dry bath (-90 C to 125 C) for rental. This is the only DRY bath available for -90 C applications which is truly portable (40 lbs) and very fast to stabilize at low temperature (i.e. ambient to -80 C in 50 minutes).

Please contact me for more information or if you need a rental quotation.

Sincerely,

Sheldon Lathrop
Sales Engineer, BSCHE
